grid autosport drag pack cars. grid autosport drag pack. grid autosport drag pack free download. grid autosport drag pack download. grid autosport drag pack скачать. grid autosport ps3 drag pack

No burnout, clutch key cannot be set, engine doesn't go dead when rev goes 0, engine keeps running when rev stays 0, car just keeps slowing down when engine rev goes below 800RPM, WTF IS THIS DLC?!! Every car is now a Tesla!!. How do you play the DIC?

. setting the clutch control is glitched. This is honestly a really fun game mode, it has become my favourite game mode in Grid Autosport. The speed is just UNBELIEVABLE (over 600-700 km/h) and it's really exciting! Only negative is that you can't upgrade the drag cars, and the cars are uncontrollable.

Worth buying, so consider it :). Fun!

So you don't manually do a burnout, big deal. The manual staging provides variance for your start timing, so that makes setup interesting. I don't understand all the hate for this DLC, it's fun if you like drag racing.

. would be great if the side by side racing worked , when you line up in mp you are both on the same side of the track and the staging lights are not linked , even though you have results that seem to say you have competed., No burnouts WTF staging lights not linked WTF , could have been great but sadly I dont think the guys who wrote the code have ever been near a drag strip.

like the game for its intent , it just lacks a cohesive execution.

. Can pop wheel stands 10/10. A very underrated dlc! It's a cool game mode; whenever u get bored of races or time attacks you just select it from the menu. Its a very different experience. It took me a while to understand what to do, so at first you probably won't understand but with time it will be better. Im not going to get into details about how it works as the description says it all...

I prefer the multiplayer version as I find doing quater finals semi finals and finals and constantly redoing laps boring, meanwhile on multi you just join in and start racing with your friend(s).

To find drag in multi and in custom gp u simply need to select the event type where it says race, keep clicking right until it says drag.

With its format its kinda like the drift event in single player as I mentioned above, of course without drifting (lol)

There are also interesting new veichles coming with this, with cars which go above 600km/h yes I was serious about that although its hard to keep those cars straight :D.

Also you can race your own cars yes (multiplayer) not at normal tracks of course there special drag tracks for it. As I said u can do it with any series, u can even have a drag with classic minis or classic muscle to mention some slow cars :)

Anyway if u are a big fan of grid but not yet owning this then definety get it, or buy the season pass that will also include this.. i bought the drag pack and thr thang to go with it to play but like it didnt install so i cant drag i have to play all that raceing what do i do. If you don't care about achievements then I don't recommend you to buy this pack. If you want some plus achievements then buy this buggy/vglitchy POS. I've played through all the 9 Drag Championships for the 1st place and I got the 3 achis, it was boring and pain in the butt. I would give this a "meh", but there are only positive and negative buttons.

---

This DLC is an awesome add on and it would honestly be close to perfect accept for one huge omission. NO BURN OUT BOX! Burn outs are a simple cut scene before staging. It really leaves me speechless. They got the staging part right but then said the hell with burn outs?? That makes no sense. Even drag racing games from 10 years ago had burn outs that would affect the cars grip off the line. If there's no burn outs fine, don't rub it in my face with a cut scene of MY car in the burn out box with out me. Drag racing involves a burn out box, staging the car, launching it and rowing the gears. It's missing one of the most fun aspects of the drag racing experience.. I like anything to do with drag racing and I have rated this positive because of the fact codemasters have managed to capture fun aspect of drag racing, I enjoy the mode it did take a little practice to get one of the drag car down the strip with a good time.

Negative side is you cant do burnouts to heat the tyers maybe in the future they will add it if they do that would be the icing on the cake.
