This game was released nearly 3 years ago at the time of my writing this and I wish they had a sequel out at this point. A.R.E.S EX is an amazing game and definatly worth it. I got the game on sale for a grand \u00a31.60 instead of it's base \u00a36.99. This game is a remake of the A.R.E.S Extinction Agenda and isn't just that, they added in a new character with their own story and ending, along with 2 new levels not seen in the original AEA. Tarus, the new character added, uses the same base weapons as Ares, yet he is, in my eyes, more of a beef-y character, with his first gun you start the game with working as Ares' once you upgrade it once. His design is significantly different to Ares aswell, showing the plit between the two. This game is a 2.5d platforming shooter in the vein of Mega Man and Metroid from back in the 8-bit era. This game is so much more of a tribute to Mega Man than Mighty No. 9, with more challenging game design and bosses. It doesn't however work in a linear story, with upgrades seen through the game and backtracking allowed to unlock everything you miss while going through the game.. DOOR STUCK. PLS I BEG YOU.

Pros:

- +Puzzles were pretty challenging
- +Leaderboards for speedrunning
- +Door stuck meme
- +Cheap price for a VR game
- +Panic mode

Cons:

- Can't turn on shower
- Very short and i wish there was more

Conclusion: If you want a fun little puzzle game i recommend this.. An Escape Room title with slick detailed graphics, in a scene reminiscent of the movie Se7en. You are a cop held captive by a serial killer and obviously, you've gotta get outta there! It's atmospheric and unsettling!

All the puzzles made sense, bar one for me and I can't say which and spoil it, but I think you'll know when you get there. I'm no brainiac but I made it out in 30mins and could've done better had I found something in the dark sooner - that's not a spoiler - it's DARK in there.

Mechanically, you use teleport which is fine, and telekinesis to grab things which can go a little awry as unwanted objects snap to your hands. There are clues on a watch you wear if you get stuck and when asked to tap the watch I could only reach it on the underside of my wrist - apart from that it works. All in all, it freaked me out, but the puzzles although logical, were a bit too easy.. Not worth the aggravation at any price point. It's a very basic match 3 with a RPG "skin" and a few usable items to affect the play field, your "enemy" doesn't even make any moves they just attack you if you match the wrong kind of gems.

Main problem is this game is not stable, every 10-15 minutes the game will freeze or crash to desktop, seem to happen in both windowed mode and full screen mode. Maybe it work better on some systems, guess it's an older game but judging by the forums I'm not the only one with this issue, ultimately the game is not worth trying to figure out what the problem is for me at least, I'll just refund it myself before I pass the 2 hour mark. So would not reccomend it.. AMAZING!!!! I first played the og game on newgrounds and it was very fun, when i heard they were making a second game i went insane! this game provides so much action packed gameplay that you will still be coming back for more! The campaign was so good and im waiting for the 2nd chapter. Highly recomend it! (P.S. there is a vast character customization and online play is hilarious.

Gentle paced point n click with some interesting humour and ambience.

A few minor annoyances and a little short but overall an enjoyable experience and will definitely buy the next act.. Bad game that barely gives you any indication of how it's meant to be played. Books fall down continuously in two columns on the screen, and you're supposed to click and drag them to sort them. It hardly ever works, and you often lose within the first few minutes of playing. Something more than a few second long video of someone playing to act as a tutorial would've been nice. Definitely pass.. Dat moment when a game doesn't have a quit option ingame xD. In my opinion, the game is not bad. Despite the art and script might be a little off, but i like the idea of the VN game unlike other.

:3. ing worthless dont play

you play as a cube that moves around a world. that is it. it is more boring than it sounds. i think this is supposed to be art but lol. just because you make a weird game with no point to it doesn't mean it's artsy. Developer Official Andy (made up tripe company name) trying to appeal to those with Steam Achievement Disorder (SAD) with 5,000 tiny pictures. Motive trying to get rich quick preying on the pathetic. Buys \$5.00 asset (<https://assetstore.unity.com/packages/templates/packs/clicker-game-example-33906>), does very little change and then sells it for \$1.50 each. Marketing = 'Say Baaaa!'

Pathetic Customer Gamer = 'Baaaaaaaaa!!!'

. Bad game. I will never be the same after this.. Been playing for a year and still enjoying.

first thing to note to enjoy all the features youth leagues, youth accadamies and friendly matches you need to pay a monthly subscription but this a sub to play basis opposed to pay to win. it's a few quid a month to enjoy these features and i'd recommend you do so

I love the game, but there's a learning curve with a MMO so you have to be patient, you also have to effect in any league there are 20 other managers like yourself and only one can win.

You'll know within 2-3 weeks if you love the game or not, only thing to note you'll start in the lower divisions where they are fewer active teams so you may have to wait a few months before you are regularly playing online teams
